

CGI Accel360

AUTOMATION AS A SERVICE

Organizations today are rapidly adopting intelligent automation. They are progressing from operational to strategic automation, leveraging advanced capabilities to recognize accelerated productivity gains.

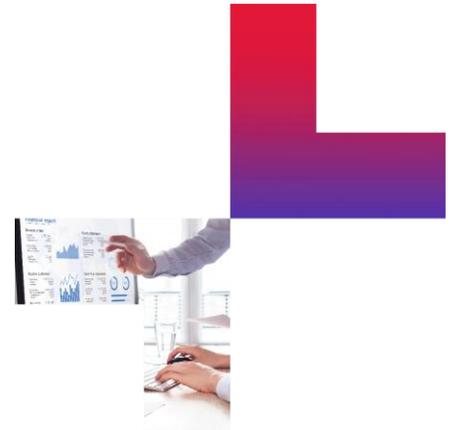

Our research into digital leaders shows they intently design, manage and evolve their [digital value chain](#) to accelerate business outcomes. This requires managing and governing their distributed enterprise data as a strategic asset, integrated with advanced analytics, machine learning, artificial intelligence, decision science, and intelligent automation.

Organizations are challenged in scaling [intelligent automation](#) due to the initial start-up costs, constantly changing technology, and maintaining infrastructure and staffing. CGI Accel360 solves these challenges by providing a rapid onboarding and subscription-based model, enabling clients to focus on their business transformation.

Modernizing business processes with cloud-based intelligent automation

CGI provides a fully-managed service (on-prem, public cloud, or CGI cloud) for hyper-automation that enables you to gain all the benefits of automation technology without managing the platform. CGI Accel360 is a scalable, flexible, secure, and easy-to-implement platform that delivers value quickly. CGI-hosted platforms include robotic process automation (RPA), optical character recognition (OCR), natural language processing (NLP), machine learning, low/no code apps, and chatbots. CGI Accel360 offers accelerated setup, increased security, and faster value realization for your intelligent automation programs.

From robotic process automation to artificial intelligence, we leverage the full spectrum of hyper-automation technologies to achieve successful business outcomes and improve our client's customer experience and operational efficiency.

Accelerating business value through hyper-automation at scale

CLIENT SUCCESS STORY

A global health sciences company was challenged by increasing demand to reduce costs and increase efficiency. The RPA Center of Excellence's backlog was expanding to use cases that required skills beyond RPA. Through expanded partnership with CGI, the client was able to quickly transform to leverage hyper-automation capabilities and scale the program across the enterprise. By combining RPA with AI and human-in-the-loop expertise, CGI is providing holistic solutions for complex use cases

Experience the benefits

Ease of implementation and ability to scale

Clients can scale from a single process to unlimited processes with or without their own infrastructure, licensing, and team support.

Flexible and quick to value

Clients will have access to all automation capabilities but pay only for what they need, enhancing the total cost of ownership. Due to our rapid deployment approach, clients realize the value of automation much faster.

High security and availability

Our platform leverages industry standards that cloud service providers use for security. These standards are reinforced, when necessary, with customer-specific national information security guidelines.

Cross-industry experience and partnerships to drive business growth

CGI has cross-industry experience delivering intelligent automation solutions, certified experts, and strategic technology partnerships with UiPath, BluePrism, and Automation Anywhere. Leveraging our expertise and partnerships, CGI's intelligent automation services have enabled clients to reduce costs, improve customer experience, expand existing automation investments and drive business growth.

Why CGI?

- We bring over 1,000 advanced analytics and AI experts and over 600 RPA-certified professionals, holding over 3,000 automation certifications with major technology platforms
- Our automation implementation expertise spans major industries, including financial services, health, and life sciences
- We bring strategic partnerships and expertise with UiPath, BluePrism, and Automation Anywhere
- Our extensive global delivery network and seven Global Centers of Excellence in automation give you access to the right skills from the right locations at the right time and for the right price

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-based to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
